Important Pilot, Aircraft and Airport Etiquette:

- Your Pilot will designate your flight as a “compassion flight” with air traffic control.
- No smoking is allowed in or near any aircraft.
- Do not play with or move any of the aircraft parts, or try to enter the aircraft without specific instructions from the Pilot.
- Leave the aircraft clean and report any damage or problem to the Pilot.

As with any mode of transportation, certain risks are present. You should also know that the same regulatory standards that apply to commercial charter, or airline flights, will be followed by the flight crew conducting your flight.
